PROFESSIONAL SUMMARY

Product leader specializing in B2B/B2B2C SaaS, with a track record of launching revenue-generating products and establishing product organizations from scratch. Cross-functional fluency across sales, engineering, and customer success enables deep collaboration at every layer of the business. Experienced designing and shipping production AI features, with a full-stack technical background to match. Data-driven, with a focus on defining clear success metrics and tying decisions to measurable business outcomes. Thrives building for both technical and non-technical users in high-growth startup environments.

WORK EXPERIENCE

Intellum | New York, NY (Remote)
Senior Product Manager | August 2026 – Present

Enterprise customer education and learning management platform enabling global enterprises — including Google, Meta, Amazon, TikTok, and Walmart — to educate employees, partners, and customers at scale.

- Own product strategy for AI infrastructure and platform extensibility — spanning in-app conversational agents for B2B and B2B2C enterprise experiences, Model Context Protocol (MCP) tooling enabling customers to embed Intellum into their own AI agents and corporate LLMs, and the monetization infrastructure to price and bill for AI-powered usage at scale.
- Lead integration and data platform strategy — including third-party ecosystem connectors, enterprise data pipeline architecture, and BigQuery-based analytics infrastructure enabling customers to operationalize learning data across their broader tech stack.

OnRamp | Boston, MA (Remote)
Senior Product Manager | August 2025 – July 2026

AI-powered customer onboarding and engagement platform enabling CS teams at leading B2B/B2B2C companies - from Fortune 15 enterprises to high-growth startups - to accelerate time-to-value and scale operations.

- **Founding PM —** established product management function from scratch, creating the processes and ways of working that connect engineering and the business.
- **Doubled Reporting adoption in first 3 months** to 45% of customers through a comprehensive product overhaul including AI-powered insights — directly resolving the platform's #1 sales loss and churn driver in 2025.
- **Own end-to-end product strategy for OnRamp AI** reporting and end-customer engagement - enabling natural language workflows, conversational data interaction, and proactive recommendations that surface actionable intelligence across the platform.
- **Own end-to-end product strategy for** the B2B2C customer portal - the end-user-facing surface of the platform that directly drives customer time-to-value and retention outcomes for CS teams.

LeagueApps | New York, NY
Senior Product Manager, Scheduling & Mobile Apps | December 2021 – June 2025

All-in-one B2B2C SaaS operating system for youth sports. Since 2012, it has grown from an early-stage startup to serving over 3K customers and 30M users in 2025.

- **Own end-to-end product strategy and roadmap** for the scheduling product and related API surfaces, balancing new feature development, platform investments, and technical debt to drive adoption, retention, and growth.
- **Increased adoption of the schedule product by 15%**, increasing both customer retention and sales revenue.
- **Drove a 20% gain in developer efficiency** and enabled modular, extensible API capabilities that support long-term scalability by transitioning core internal tools from a monolithic architecture to microservices.
- **Led 0→1 product development and GTM of LeagueApps Facilities,** integrating third-party booking tools to enable real-time facility inventory management and customer data sync - driving ~$500K in combined new enterprise sales and retained ARR in year 1.
- **Led 0→1 development and GTM of LeagueApps Play,** a native iOS/Android app now used by 250K+ MAUs (parents, players, and coaches).

Product Manager, Payments & Integrations | March 2017 – November 2021

- **Led discovery, design, development, and GTM of 50+ products and features** across registration, payments, e-commerce, communication, scheduling, reporting, CMS, API, and iOS/Android app components.
- **Collaborated cross-functionally to develop LeagueApps Gateway,** a Stripe Connect-powered internal platform supporting secure customer payments and accounting workflow, now processing over $1B transactions/year.
- **Led 0→1 development and GTM of Design Shop,** a WordPress-based web product development service for SMBs, securing $750K in first-year revenue and scaling to $1M+ ARR by building an in-house agency.
- **Launched the LeagueApps Integration Center and Zapier App Store listing**, enabling no-code and API-based workflows for developers, partners, and power users that supported hundreds of enterprise customers - contributing to ~$5M+ in influenced ARR through sales enablement and churn prevention over time.

Product Marketing Manager | May 2016 – March 2017

- **Led GTM strategies for dozens of launches**, creating help articles, videos, and hosting webinars to drive adoption.
- **Conducted market intelligence and competitive analyses**, coordinating sales engineering and support to shape product positioning.

Head of Customer Success & Onboarding | July 2015 – April 2016

- **Managed a team of four direct reports** while activating 300+ enterprise and strategic accounts, generating $5M+ in ARR, including the company's first professional league partnerships with Madison Square Garden, Major League Baseball, and the NBA.
- **Implemented the company's Salesforce instance from the ground up**, replacing manual workflows with structured processes to automate cross-departmental communication and customer tracking.
- **Increased customer activation by 10%** by creating a self-service checklist that streamlined onboarding.
